

Pain Ease Wraps

Microcurrent therapy wraps
for pain relief

Description

The product range consists of 7 different types of wrap, each specifically designed to target back, knee, wrist, ankle, elbow, neck and shoulder pain. The power supply of the wraps are provided by a special snap-on battery unit, which lasts for up to 6 months depending on use. Replacement battery units are also available to order.

Recommended for

- ✓ relief of continuous and occasional musculoskeletal pain
- ✓ sport injuries
- ✓ stiff knees and joints
- ✓ pain in joints
- ✓ stressed, tense neck and shoulders
- ✓ muscle injuries and pain
- ✓ accelerating the healing process

Claims

- ✓ alleviates musculoskeletal pain
- ✓ accelerates the healing process

Advantages

Drug-free solution for pain relief, can be worn comfortably under clothing, easy to use. Microcurrent is below sensory threshold so there is no discomfort.

Instructions for use

Moisten the fabric pads then wrap the moistened product around the painful or aching area and snap on the battery unit. After that a very small amount of electrical current flows through the moistened fabric and through the pain centre.

How it works

Microcurrent treatment helps promote tissue regeneration. It contributes to the healing process by reducing pain at the source of the problem. Whenever pathology of tissue occurs there will be an increase in the resistance in the area, so nutrient supply will decrease. Microcurrent stimulation decreases that resistance and nutrition of tissue restores where repair takes place.

Package contains

Microcurrent therapy wrap, contact spray bottle, battery unit, instruction manual

Documentation and others

EC Declaration of Conformity, EC Certificate (in compliance with the Council Directive 93/42/EEC)
ISO 9001 Certificate, ISO 13485 Certificate
